```
        /** Program to Implement Structure with Pointers **/

#include<stdio.h>

struct student
{
     char name[20];
     int rollno;
     float marks;
};

void show(struct student *);

main()
{
     struct student s1 = {"xyz", 1, 450};
     show(&s1);
     getch();
}

void show(struct student *ptr)
{
     printf("Student name\tRollno\tMarks\n");
     printf("%s\t\t%i\t%f",ptr->name,ptr->rollno,ptr->marks);
}
```
