```c
        /***    Program to Find Vowels in a String    ***/

#include <stdio.h>
#include <string.h>

main()
{
    char str[20];
    int count=0, i=0;

    printf("\nEnter any string: ");
    gets(str);

    while (str[i] != '\0')
    {
        if (str[i]=='a' || str[i]=='e' || str[i]=='i' ||
                            str[i]=='o' || str[i]=='u')
            count++;
        i++;
    }

    printf("\nNo. of vowels: %d", count);

    getch();
}
```
